DETAILED ACTION

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection. Previous rejections / objections not addressed below addressed below are withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 21 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 21 recites the phrase " the 1 or 2 substituents S are bonded to ring atoms of Het *which are not adjacent to the linkage site forming the double bond*". This phrase appears to be new matter. See italicized portion of the phrase in this office action.

Allowable Subject Matter

Claims 1-20 are allowable. The prior art does not teach or suggest the compound of formula I wherein R1 is halogen, alkyl, alkoxy, cycloalkyl or haloalkyl and Het is a 5-6 membered heteroaromatic ring.
